

A large circular image on the right side of the slide shows a pair of hands holding a large quantity of small, multi-colored plastic fragments, representing recycled material. The fragments are in various colors including blue, yellow, red, green, and white.

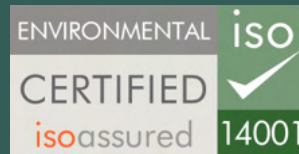

Sustainable Print Solutions & Zero-waste Recycling with Commerce Business Systems

Copy • Print • Scan • IT • Telecoms

Reducing Waste and our Impact on the Environment.

At Commerce Business Systems (CBS), we ensure every aspect of our operation is carried out with the environment in mind, and every member of the CBS team is committed to helping our customers reduce their own environmental impact through our range of accredited and innovative Develop, Sharp and Ricoh print solutions, IT and Telecoms services and responsible recycling practices.

The CBS fleet consists of either hybrid or fully electric vehicles

Comprehensive Recycling Solutions

CBS partners with leading UK recycling providers to offer a zero-to-landfill recycling service for used printer consumables.

Environmental Benefits:

Reduced Landfill Waste: Landfills are overflowing, causing environmental damage and methane emissions, a potent greenhouse gas. Zero waste recycling diverts tons of material from landfills, preserving precious space and reducing our impact on the climate.

Resource Conservation: Recycling existing materials reduces the need to extract virgin resources like timber and metals. This protects natural habitats and ecosystems.

Lowered Pollution: Extracting and processing virgin resources is energy-intensive and creates pollution. Recycling uses less energy and creates less air and water pollution.

Comprehensive Recycling Solutions

○ Sustainability:

A Closed-Loop System: A zero waste programme creates a closed-loop system where materials are constantly reused and recycled. This reduces our reliance on extracting new resources, making the system more sustainable in the long run.

Promotes Innovation: The need to find new ways to recycle and reuse materials drives innovation in waste management technologies. This can lead to even more sustainable solutions in the future.

- ZERO LANDFILL
- ZERO INCINERATION
- ZERO SHIPPED ABROAD

Benefits of Recycling Used Printer and Copier Consumables

- An environmentally better solution with zero-to-landfill processes
- We use a UK based recycling facility
- Raw-material recovery for re-use: plastics and metals separated and cleaned ready for re-use
- We accept all makes and models of all printer consumables
- With most cartridges unable to be remanufactured, we're helping to make new products from the 'single-use' plastics
- Fast, reliable & professional recycling services for your customers

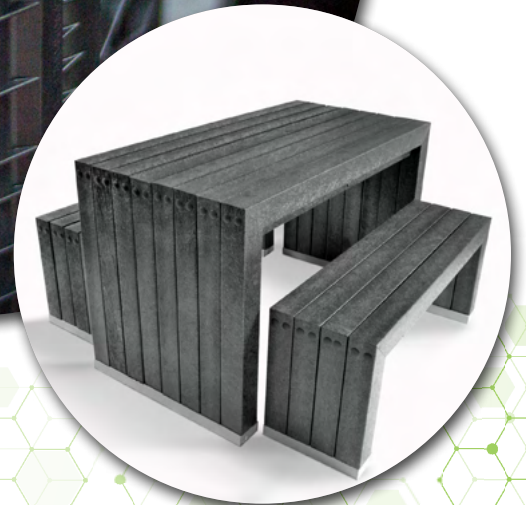

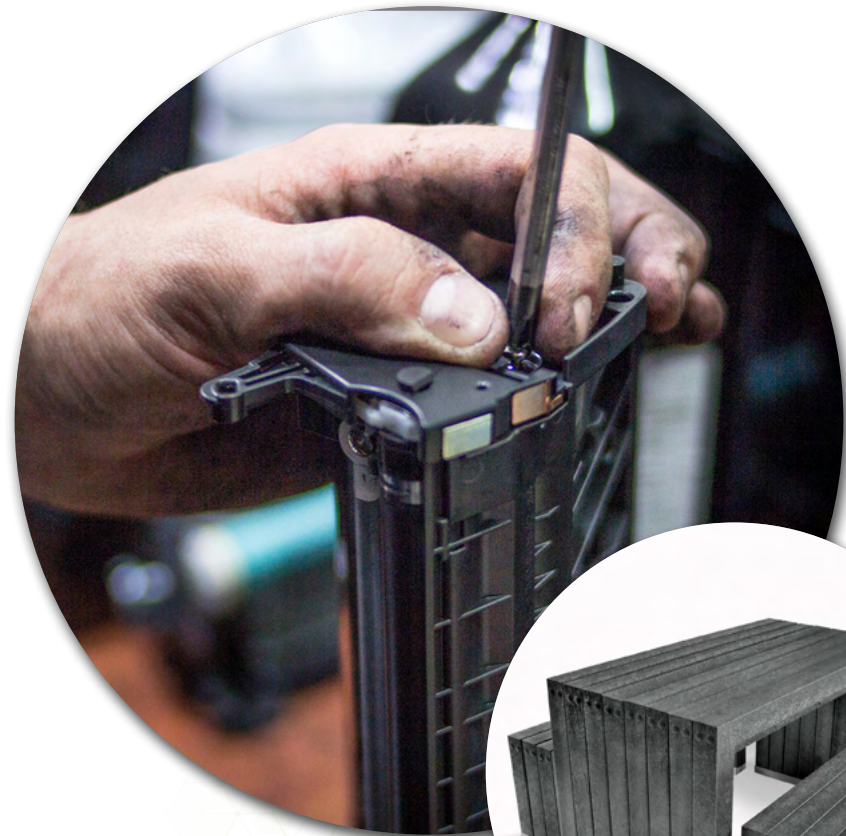

Simpler Recycling Regulations for Businesses

New government regulations came into force on 31st March 2025.

The **Simpler Recycling legislation** requires workplaces to separate recyclable materials, ensuring they do not end up in general waste.

This includes plastic waste, **such as empty toner cartridges and printer consumables**, which often contain valuable raw materials that can be reused.

Each year, millions of toner cartridges and printer consumables are discarded, many of which end up in landfill or incineration. This waste contributes to environmental pollution and the loss of reusable materials. **With stricter recycling laws coming into force, businesses are being asked to adopt more responsible disposal methods.**

We work closely with recommended recycling partners who extract the raw materials for repurposing.

Our Specialist Solution for Raw Material Recovery

WASTE COLLECTION BOXES

- Supplied with Plastic Bag
- Supplied with Seal Tape
- Supplied on Pallets
- 72 x 38 x 38 cm
- Courier-approved
- Simple & Tidy

COLLECTION

- Professional & Reliable service
- Fast (2-3 days)
- Box & Pallet options available
- Boxes up to 20Kg each
- Waste Transfer Notes provided & available online

RECYCLING

- All printer consumables accepted (inc Waste Boxes)
- Items identified & inspected for re-use or recycle
- Items processed for raw material recovery with a zero-landfill policy
- Customer Service, Reports & Support

Our products are designed to be clean, operate at lower temperatures and reduced noise levels and reduce energy costs.

Our Range meets and exceeds Environment Standards

Our range of print solutions are designed to go beyond industry environmental standards, including Energy Star® and Blue Angel certifications. With lower energy consumption, reduced emissions, and eco-friendly toner, they help businesses reduce their carbon footprint without compromising on performance.

Manufactured from Recycled and Recyclable Materials

Sustainability is built into every stage of the manufacturing of our range. Many components in our models are made from recycled plastics and responsibly sourced materials. Designed for longevity and easy recycling, our products help reduce waste and support a circular economy.

Intelligent Paper Handling features designed to greatly Reduce Waste

Our printers and MFPs make it easy to use less paper, with double-sided printing as standard, automatic blank page removal, and smart digital workflows. With features that encourage responsible printing, businesses can cut waste, save money, and reduce their environmental impact.

We maintain your IT hardware to ensure peak Environmental Compliance and Efficiency

Keeping IT and telecoms hardware well-maintained not only improves their performance but also reduces the energy they use and prevents unnecessary replacements. Our preventative servicing keeps equipment running efficiently for longer, helping businesses stay compliant with environmental standards while cutting waste.

A decorative pattern of light green hexagons and dots, some of which are filled, creating a mesh-like effect in the top left corner.
